

Thermo Cable

www.safefiredetection.com

The NEXT GENERATION...

Addressable Linear Heat Detection Wire

Thermo Cable Features

1. Better

Superior in design, construction and coating

2. Lower Cost

Volume discounts even on small orders

3. Farther

Resistance is one fourth of other LHD wire - up to 10,000 ft./zone

4. Listed for up to 35' spacing

Lower installation costs

5. Any Panel

Can be used with any Fire Alarm Panel - Maximum wire length per zone depends on resistance allowed by initiating circuit*

6. Use With Addressable Modules

Lower equipment costs and eliminate the need for expensive proprietary panels

7. In Stock

Ready to Ship

A Step Above The Rest....

*Please consult SAFE Fire Detection when using any Fire Alarm Control Panel other than the TC4410 from SAFE Fire Detection. Total wire length is determined by the resistance of the initiating circuit on the panel and will vary by manufacturer.
